## What has happened in March?

Education (GIZ)

### Call for proposals!

Today we announce an exciting opportunity! We are launching our Open Call for Proposals on fostering digital solutions for basic education via the GIZ BACKUP Initiative.

Both governments and national civil society coalitions, as well as regional civil society networks can apply for support.

You can [download here](#) all the documents related the Call for Proposals in English and in French.

TVET (Enabel)

### Collaboration with RTB!

The [Rwanda TVET Board](#) is a new institution "promoting lower level TVET, aiming at fast-tracking Rwanda's social-economic development".

"Integration of ICT into TVET is not only a good-to-have practice but also an integral component that helps students to work smoothly on different projects as they develop their professional competences."

Health (Enabel)

### Digital hospitals in DRC!

We are launching the digitalisation campaign by mapping the exact digital needs in our target hospitals in the Thsopo and Sud-Ubangui provinces, taking into account data protection and capacity building needs in terms of digital skills for healthcare staff.

Please feel free to forward to any potential partner.
